UnRisk REPORTING

Transforming Enterprise Reporting

What is UnRisk REPORTING?

UnRisk REPORTING streamlines your data report creation from multiple sources, offering a robust, standalone solution that integrates seamlessly into your infrastructure. With its intuitive, web-based report designer, creating document templates is straightforward. It supports easy integration of SQL, JSON, and Excel data sources.

Templates are customizable for precise data filtering (e.g., by product/year/month), and feature reusable elements like charts and tables for versatile template design. Setting up templates is simple, making report generation quick and efficient.

Key Features

- **Create Engaging and Reader-Friendly Reports:** Design visually attractive and easily understandable reports.
- **Connect Data Seamlessly:** Merge your SQL databases with additional sources like JSON or Excel effortlessly.
- **User-Friendly Web-Based Interface:** Create reports easily with a user-friendly, web-based report builder, that offers a Word-like interface.
- **Versatile Document Generation:** Generate documents in various formats, including PDF, Excel, and more.
- **Comprehensive Report Options:** Create diverse reports, from simple mail merges to complex hierarchical analyses.
- **Advanced Data Visualization:** Enhance reports with comprehensive data visualization options, such as charts, sparklines, and barcodes.
- **Secure Authentication:** Securely authenticate users through various methods, including Windows authentication, external identity providers (e.g., OpenID Connect or WS-Federation), or server authentication (login credentials).
- **Developer-Friendly API:** Leverage HTTP API endpoints for customized document exports, meeting your individual needs.

Key Benefits

- ✓ **DRY (“Don’t Repeat Yourself”) Principle:** Create reusable content blocks, avoiding unnecessary duplication in document updates.
- ✓ **Centralized Report Management:** Manage all your reports efficiently from a centralized platform.
- ✓ **Simplify Data Management:** Use the integrated query builder to simplify table selection and query design, reducing complex tasks to a few clicks.
- ✓ **Dynamic Report Filters:** Benefit from a flexible report parameter engine, offering an intuitive UI for effortless customization.

UnRisk REPORTING transforms your enterprise reporting, streamlining the process, enhancing efficiency, and providing an elegant solution for your data reporting needs.
